Professor Philip A. Munz,
Pomona College,
Claremont, Calif.

Dear Professor Munz:

Acknowledging your favor of the 30th
I shall endeavor to look at the material which you have
already loaned to Miss Bergfried while it is still up here.

It is possible that I may go out for
a collecting trip for the purpose of getting fresh seeds
of some of our Western species of *Crepis* and if so it would
probably be during the month of ^{June or} July. In case I should de-
cide to do this I should be anxious to have as many localities
at which it might be possible to find the various species
as I can possibly get together. For this purpose it might
be advantageous to run over the *Crepis* material in the
Jones herbarium. Is there any prospect of its being in
such shape that I could look at it for this purpose sometime
during the month of May? I do not wish to bother you with
unreasonable requests but am merely inquiring as to the
prospects.

Thank you for the kind invitation to
come to Claremont and I wish to assure you that it is my
desire to do so as often as possible.

Very sincerely yours,

E. B. Babcock
